Cameron's practice focuses on preparation and prosecution of patent applications and evaluation of patentability and non-infringement.

Cameron is a registered patent attorney with a background in electrical engineering and computer engineering. He has experience working with patents covering a wide variety of technologies including software, semiconductors, telecommunication systems, computer memory systems, display devices, batteries, power converters, implantable miniaturized neurostimulators, implantable microsensors, implantable medical leads, inductive wireless power transfer and communication, implantable pumps, analog and digital circuits, and biological signal processing.

Previous Work

Prior to joining Arent Fox, Cameron was an associate at a national law firm. He also previously prosecuted patents in-house at the Alfred Mann Foundation, a non-profit organization dedicated to developing and commercializing innovative medical devices.
